WEATHER OF CONCERN

Weather of Concern

- The National Weather Service is predicting that a deep upper level trough will produce rain and gusty wind conditions for Northern California mountainous and valley locations this weekend with primary concerns for rock or mudslides in burn scar areas. However, rainfall rates are not anticipated to exceed flash flood guidance.
 - Widespread rain is expected to impact Northwest California Saturday night into Sunday morning producing 1 – 2 inches of rain.
 - Snow levels will be over 9,000 feet on Saturday and then fall to 4,000 to 5000 feet Sunday evening.

Active Weather Warnings, Watches and Advisories by County:

- <https://alerts-v2.weather.gov/counties/CA>

WEATHER SYNOPSIS BY REGION

NORTHERN CALIFORNIA

A deep upper level trough will bring rain and gusty winds to Northwest portion of the region this weekend. A few showers will be possible during the day Saturday in Humboldt and Del Norte counties, but widespread rain will hold off until Saturday night into Sunday. Total rainfall through Sunday evening will include 1-2 inches in Del Norte County, and 0.5-1.5 inches in Humboldt, Trinity, and Mendocino counties. Higher amounts will be possible in southwest facing mountainous terrain. Snow levels will begin over 9,000 feet on Saturday and then fall to 4,000-5,000 feet Sunday evening. In addition to the rainfall, gusty south winds are expected in Humboldt and Del Norte counties Saturday into Saturday night. Wind gusts of 40-50 mph will be possible on mountain ridge tops and coastal headlands.

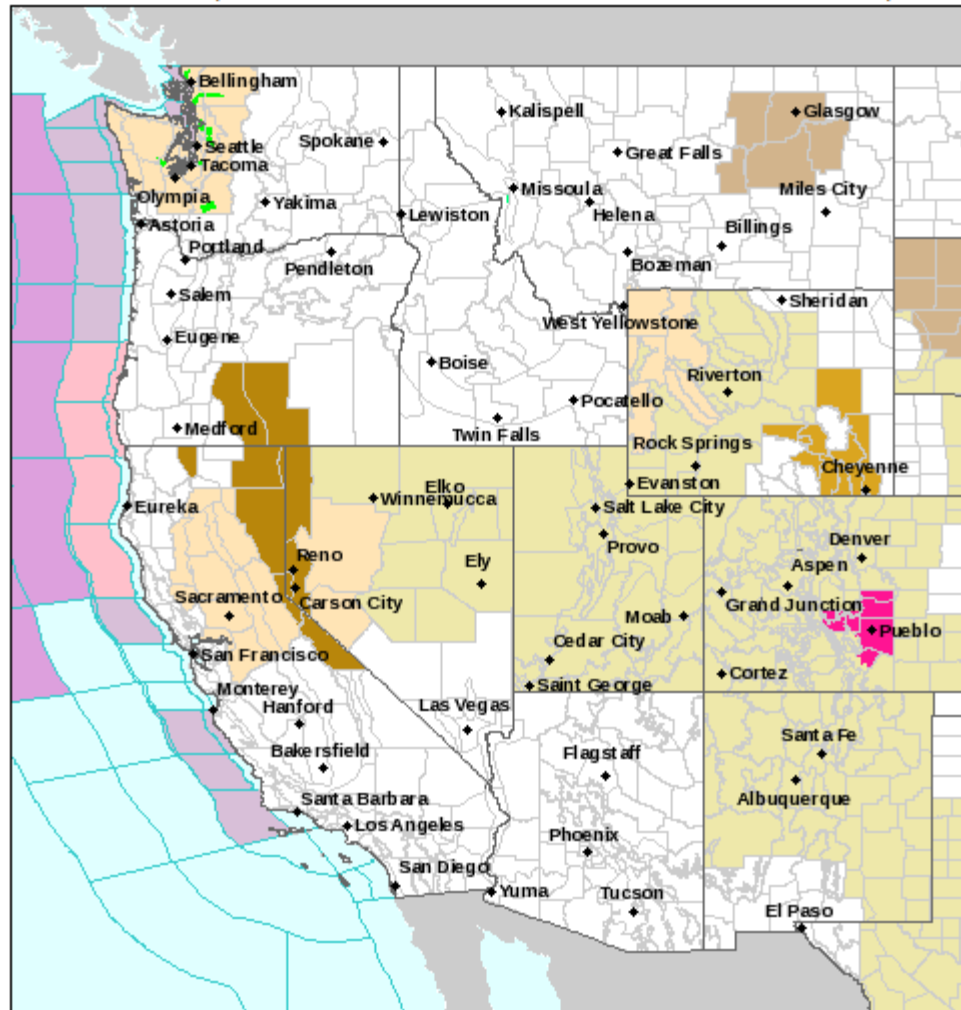

SOUTHERN CALIFORNIA

Temperatures will cool slightly through Saturday as the strong high pressure area centered off the Northern Baja Coast weakens a little. However, maximum temperatures will still be 10 to 20 degrees above normal with mid 60s to mid 70s across the mountains, 70s in the Central California Valleys, and 80s in the region valleys. Minimum humidity will be mainly in the teens through Saturday. Winds will be light through Saturday. A Pacific trough will approach the West Coast Sunday and push inland Monday bringing significant cooling to the region. Temperatures will be below normal across the entire area by Monday. This trough will also bring scattered showers away from the deserts Sunday evening through Monday afternoon, with most locations expected to receive less than a quarter inch of rainfall.

However, the Central Sierra and the Big Sur Coast will likely receive between 0.5 and 2 inches of rainfall. The snow level over the Sierra will be between 7,000 and 8,000 feet. There will be south to west winds of 20 to 30 mph with gusts to 50 mph across wind prone mountain, desert, and Central Coast locations Sunday afternoon through Monday afternoon. Temperatures will warm to around 10 degrees Tuesday and Wednesday as a ridge of high pressure builds into California from the Pacific. North winds of 20 to 30 mph with gusts to 50 mph will surface across much of Santa Barbara County and the Grapevine Monday night. There will be northeast to east winds of 15 to 25 mph with gusts to 40 mph across the mountains and below the canyons and passes of the region Tuesday. At this time, it looks as though there will be a big pattern change starting late next week as storms work their way south into California and significant rainfall will be possible by next weekend.

Cal OES MISSION TASKING

Cal OES Missions

- **2017-Inland-37776:** Two Air Monitors for Mariposa County (On Scene)
- **2017-Coastal-37716:** One Air Monitor for Humboldt County (On Scene)
- **2017-SOC-38645:** One California Department of Transportation Archeologist to support the Joint Field Office (JFO) from 11/13/17 to 11/28/17. In coordination with a Cal OES Senior Environmental Planner, the Associate State Archeologist will review Disaster Damage Descriptions for potential California Historical Resources Information System (CHRIS) requests and request CHRIS reports when necessary.
- **2017-SOC-41344:** Individual Assistance (IA) request for cache phones for each lead for the LACs/DRCs for the Governors Office to contact them
- **2017-IREOC-38682:** DTSC Hazardous Waste Task Force (Helena Fire)
- **2017-IREOC-38683:** CalRecycle Debris Management Task Force (Helena Fire)
- **2017-Cal OES-35819:** Twelve Caltrans engineers requested to conduct damage and site inspections throughout the state for impacts related to 2017 February Winter Storms. The lead engineer will report to the Joint Field Office to coordinate the response.
- **2017-Cal OES-38400:** One Air Quality E-BAM modem for Klamath (Del Norte OA)
- **2017-Cal OES-38725:** Caltrans to perform bridge inspections on the National Trails Highway, San Bernardino County (On Scene)
- **2017-Cal OES-39160:** Communications Support for the Helena Fire, Trinity County
- **2017-Cal OES-42559:** Weather station installed to gather real time rainfall data by Air Resources Control Board (On Scene)
